Superintendent

## NOTICE TO RESIDENTS AND BUSINESSES OF THE TOWN OF COLONIE

The Latham Water District has awarded a contract to New Castle Paving, LLC. for the construction of two new water mains to be utilized as emergency interconnects with the City of Albany's water distribution system.

One of the interconnections will be 3,200 feet of 16-inch ductile iron water main and its associated metering and pumping vault constructed along VFW Drive and New Karner Road. Construction will begin at Latham Water District's existing water main in front of 140 VFW Drive, and proceed west along VFW Drive and then southwest along New Karner Road to the City of Albany's existing water main south of the Pine Bush Preserve Discovery Center.

The second interconnection will be 3,400 feet of 24-inch ductile iron water main and its associated metering and pumping vaults constructed on the Town of Colonie's Loudonville Tank and Pump Station site adjacent to the Sanderson Heath Haven Park and the City of Albany's Loudonville Reservoir property.

Once this project is completed, these bi-directional interconnections will benefit both communities by providing a backup water supply should either community experience a water supply emergency.

Construction is expected to begin on Monday April 8<sup>th</sup>, 2019 and be completed by the end of July 2019. During construction residents, employees and patrons of businesses along VFW Drive are urged to seek alternate travel routes if possible to avoid travel delays.

Latham Water would like to thank you in advance, for your cooperation during this water main installation project. If you have any questions concerning the project you can call the Latham Water District at 518-783-2750.
