

Notice to Businesses and Residents of the Town of Colonie

The Latham Water District will continue its yearly flushing of the water system from 9:00 p.m. and continue until 7:00 a.m. Sunday nights through Wednesday nights. Flushing during the night hours will continue until Wednesday, July 1, 2020.

Flushing may temporarily discolor the water. This is normal and poses no health risks. However, resident should wait to use washing machines and dishwashers until water is clear.

Special Advisory: Freshen building water systems

As businesses prepare to reopen, the Latham Water District asks that businesses flush hot & cold water systems that have been inactive for more than two weeks to improve water quality and protect public health. This applies to any facilities that have been shut down, including private site-wide distribution systems, office buildings, hotels, child care facilities and residences. Anyone with questions can go to our website or contact the Latham Water District at 518-783-2750 or info@lwd.org.
